

Salvador Hernández López

Full Stack Developer

Areas of Knowledge

- React** I fully know how to use class components, functional components, hooks, context, reducers and Redux, using modern ECMAScript syntax like React documentation suggests. I've used Material UI to the user experience of the projects.
- Vue** I've developed Vue applications using tools as Vuex, Bootstrap-Vue, UI-Vue tools.
- Angular** I master using the components of this framework and I always take advantage of the Angular materials to have good UI results.
- NodeJS** I used to develop web apps using NodeJS Express and Jade. But, nowadays I've tended to make API rests in order to make MEAN/MERN/MEVN stack apps.
- Lambda functions** I've worked with AWS Lambda functions and SAM to work locally with them.
- Ruby and Rails** I've maintained a project on Ruby and Rails coding API endpoints and unit tests.
- Laravel** I've created projects with Laravel framework using the MVC Laravel tools and the testing tools.
- Docker** In order to develop and deploy some projects I've created containers and images using Docker and Docker-Compose.
- Databases** I start designing the database and then I implement them in MySQL, PostgreSQL, MariaDB or SQL Server.
- Java** I have a lot of experience coding in Java since I've worked with it for a long time. I know how to make either CLI apps, GUI apps and web apps.

Tools

- Neovim** In order to improve my efficiency coding, I write my code in this text editor.
- Visual Studio Code** I usually use VS Code on pair programming sessions using LiveShare plugin.
- Git** I've worked with Git servers like Github, Gitlab, Bitbucket using Gitflow as git workflow.
- Swagger** I've used Swagger in order to check how the API is going to answer and how I should map the data in front end.
- Storybook** In order to isolate components and work with them easily, I've worked with Storybook.
- Jira** I've used the Jira board joined with Bitbucket to verify tickets and work the Kanban / Scrum with the team.

Slack Much of the time I've communicated with the team with this tool.
Google Meet The meetings to scrum or just to ask or resolve quick questions usually I use Google meets.

Professional Experience

2021–Present **Full stack developer**, *JibJab*

Working at JibJab I've created features and componets on the web app, working on the frontend, backend and manteinig AWS lambda functions.

2018–2021 **Web developer**, *The Software Artisans*

Under thw period on TSA I've developed web solutions using differents tools for example NodeJS, Laravel, Angular, VueJS etc. and I've trained new people in TSA.

2020 **Web developer**, *XML Team Solutions, LLC*

I've developed a CRUD web application using Laravel and docker.

2017-2018 **Developer and tester**, *Instituto Tecnológico de Estudios Superiores de Zamora*

I've created multiples modules to CRUD web applications using PHP
