

# Salvador Hernández López

---

*Full Stack Developer*

## Areas of Knowledge

- Laravel** I've created projects with Laravel framework using the MVC Laravel tools and the testing tools.
- AngularJS** I've worked in AngularJS projects where I've created web components and I've communicated them with an API
- Angular** I master using the components of this framework and I always take advantage of the angular materials to have good UI results.
- ReactJs** I fully know how to use both the props and class components, stateless functional components, hook components and Redux, using modern ecma script syntax like React documentation suggest.
- NodeJs** I used to develop web apps using NodeJS Express and Jade. But, nowadays I've tended to make API rests in order to make MEAN stack apps and MERN stack apps.
- Docker** In order to develop and deploy some projects I've created containers and images using docker and docker-compose.
- Git** I've used git and git-flow as version control system and github, gitlab and bitbucket to work in team.
- Java** I have a lot of experience coding in Java since I've worked with it for a long time. I know how to make either CLI apps, GUI apps and web apps.
- Databases** I start designing the database and then I implement them in MySQL , MariaDB or SQLServer.

## Professional Experience

- 2019–2020 Web developer, Ventacity.**  
Under the period on Ventacity I've developed frontend solutions using VueJS, Javascript, Typescript and Vuex tools. Besides In the backend I've used Laravel and NodeJS
- 2020 Web developer, XML Team Solutions, LLC.**  
I've developed a CRUD web application using Laravel and docker.
- 2017-2018 Developer and tester, Instituto Tecnológico de Estudios Superiores de Zamora.**  
I've created multiples modules to CRUD web applications using PHP
