## Areas of Knowledge

- Laravel** I've created project with Laravel framework using the MVC Laravel tools and the testing tools.
- ReactJs** I fully know how to use both the props and class components, stateless functional components, hook components and Redux.
- Angular** I master using the components of this framework and I always try to take advantage of the angular materials to have good UI results.
- NodeJs** I used to develop web apps using NodeJS Express and Jade. But, nowadays I've tended to make API rests in order to make MEAN stack apps and MERN stack apps.
- Docker** I've created container and images using docker and docker-compose to develop and deploy projects.
- Git** I've used git, git-flow as version control system and github, gitlab and bitbucket to team work.
- Java** I have a lot of experience coding in Java since I've worked with it for a long time. I know how to make either CLI apps, GUI apps and web apps.
- Data bases** I start modeling using CASE tools and then I implement them in MySQL , MariaDB or SQLServer.
- Software engineering** I'm able to make software engineering that goes from requirements analysis using case tools.
